only the hottest day of this present year 1858, but perhaps as hot as any day for years past. The remark was general. We understood that the thermometer in the office of the Collector of the port ranged as high as 961/2 | dor. at four o'clock in the afternoon. There was no observable decrease of the heat until the evening breeze sprang up. After midnight it thundered and rained, than before it. Sleep was out of the question.

On the morning of Monday, which was kept as the 4th, we were awakened by the firing of musketry. We heard music, but did not know whence it proceeded .-The Wilmington Light Infantry, we understand, turned | your fair hands this beautiful emblem of devotion to our out, early in the day, and although not quite full in num- adopted country. bers, made a very handsome appearance. The German Volunteers were out with full ranks, presenting quite a soldier-like appearance and excellent drill. As the day advanced, people began to scatter out of town to the sound, to Smithville, to anywhere in fact, so that during the most of the day-time, Wilmington presented an appearance of desertion. It looked like Sunday.

The German Volunteers celebrated the day by a picnic out to Hilton, at the house and grounds of Dr. McRee. Between nine and ten o'clock in the morning, the Company paraded in Major Walker's yard on Prin-Company through Captain Cornellsen. All who went down were liberally provided for by the hospitable denizens of Wrightsville, and the feeling of kindness and good fellowship which prevailed more than compensated for any inconvenience due to the unfavorable state of the weather.

The Spray, Captain John B. Price, carried down a very large party to Smithville. She returned before dark, all right and tight. We understand that the excursionists had a good time generally.

Apparty of citizens, with their families, also went down to Oak Island and the Black Fish Ground on the tug Mariner, which they had hired for the occasion .--No doubt they enjoyed themselves.

The Fourth of July is-the Fourth of July, and occasionally, a good quiet citizen who is not even on speaking terms with John Barleycorn, will show his independence by taking a wrestle with the old fellow, who in the long run is sure to throw him. These things pass off and are forgotten. Upon the whole, there was little even of thisless than usual. As yet we have heard of no accidents worth naming. We trust that we may be spared the painful duty of having to record any case of serious injury to life or limb.

The day was appropriately celebrated by the delivery of orations, the reading of the National and Mecklenburg Declarations, etc., at different points throughout this and other counties. In due time we expect to receive accounts from kind friends residing in the different localities.—Daily Journal, 6th inst.

It is a riddle.

But we grow serious where we commenced with no such intention. Our object may have been only to remark upon the universal languor produced by what appears to us to be the hottest day we have experienced this year-whatever it was, the mood has passed away, and we cannot return to any light or cheerful strain, so we stop. The lessons of life, we fear, begin to give a sombre tone to the feelings.

OUR ARMY AND OUR NEW TERRITORIES .- The soldiers in the American army are better fed and clothed than those in any other service, but as a general rule they are compelled to perform a class of duties more harrassing, fatiguing and annoying than those of any other force. Stretched along a frontier of thousands of miles, in isolated squads, out among the mountains, the burning steppes, or the waterless prairies, watching the wild and debased Indians, or the searcely less wild and debased floating white population, the outcasts of civilization, either driven off for their crimes, or impelled by recklessness and impatience of the restraints of social the boy, not being able to swim, made a rope fast to the life; such are the localities and such the characters with which the U. From the N. Y. Evening Post. Burning the Dead_How to do it?

A book has lately been published in London, which seeks to show the advantages of the ancient method of burying the dead. The only objection its author, who tal immortality. is "a member of the College of Surgeons," finds against burial, is a sanitary one. He says that "it is proved beyond all doubt that during the progress of that decomposition which a body undergoes when buried, the elements of which it is composed, before entering into other and a purer state, form certain putrid gasses of so deadly a nature, that their inhalation in a concentrated state, has been known to cause instant death; while in a more diluted form they are productive of a most serious injury to health. These dreadful effluvia vary very much in their virulence, according to circumstances; and there is probably one particular stage of decomposition in which they attain their most fatal power."

Churchyards are, it is well known, most pestiferous places. And we are assured that the gases emanating from the bodies when diluted, possess the power of "producing various diseases, diminishing the average duration of life, lowering the tone of general health, and thereby rendering thousands more liable to be attacked by fever. cholera, or other epidemics. It is not because they are often imperceptible to the sense of smell, that they are

medical practitioners in the world, and many cases have

lime, for the same purpose. Having submitted it, with an explanation of its components to a number of Physicians of Philadelphia, among whom were the late Drs. Joseph Hartshorne, and J. C. Morton. has received their entire approval, and many of the Medical Faculty are now not only prescribing it for their patients. but are using it themselves personally, and in their families. As a tonic, it is unequalled, and its properties are of so invigorating a nature, that it is given with perfect safety and success to the most tender infants. The "Elixir" is very gradual, out certain in its action of

on the organs of digestion, the increased secretions of the liver, pancreas and mucous membrane of the stomach, and requires that only one dose be taken in twenty-four hours for confirmed Dyspepsy can only be cured by gradually re-storing the organs of digestion to a healthy state.
